Organic Funk strikes chord at Disneyland

BACKSTAGE Productions is at midem to spread the word about Organic Funk, described by company founder Steve Thomson as "musical purists with something to say and a pure, raw way of saying it".

Blending contemporary rock with a funky groove and a hint of retro, Organic Funk is fresh from their first European tour, which culminated with a concert at Disney Village Paris. Backstage recorded the per-

formance, which will be released on DVD early this year. A TV special is also being planned around the event.

"The 'concertmentary', as we like to call it, features a collection of the band's own material, plus cover songs from the Disneyland Paris event," Thomson said. "It's designed to entertain, while giving the audience an inside look at the band's musical and social influences."

The DVD is available through The Orchard.
